

## How to Clean Up After Using Putty

This is a easy technique I use when puttying. It helps me keep my putty pliable in the tube for a very long time.

When I putty I use a piece of masking tape. I tape this to my cutting board and place a dab of putty on it. The dab size depending on how much puttying I plan to do.

When I am done using the putty I can just pull up the tape and toss it. Wha-la, clean work space.
